

Advocating for Veterans on Capitol Hill

By Mark Murphy, Executive Director NEPVA

In June, our New England Chapter was proud to represent our members at the 2026 PVA Advocacy and Legislation Seminar in Washington, D.C. Joining me were our President and National Director, Brad Carlson, Treasurer Ericka Haddad, and Kathy Carlson as we met with members of the New England congressional delegation to advocate for the needs of veterans living with spinal cord injury and disease.

Throughout the week, we held many productive meetings with lawmakers and their staff, including memorable conversations with Senator Maggie Hassan (NH) and Representative Maggie Goodlander (NH). These meetings pro-

vided an opportunity to share the real-world experiences of our members and discuss the policies that have a direct impact on their health, independence, and quality of life.

Among the issues we advocated for were protecting and strengthening the VA's nationally recognized spinal cord injury and disorder (SCI/D) system of care, improving caregiver support and bowel and bladder care services, increasing financial support for catastrophically disabled veterans and their survivors, expanding benefits for families of veter-

Every conversation with a senator, representative, or congressional staff member helps educate policymakers and ensures that the voices of veterans with spinal cord injury and disease continue to be heard.

ans with ALS, and improving accessibility and protections for travelers with disabilities. These priorities are about ensuring that veterans with catastrophic disabilities receive the care, resources, and respect they have earned through their service.

A special congratulations goes to Ericka Haddad, who participated in the Advocacy and Legislation Seminar for the first time as a representative of our Chapter. Ericka did an outstanding job engaging with congressional offices, sharing her personal experiences, and helping communicate the importance of protecting and strengthening programs that veterans with spinal cord injuries rely on every day. Her preparation, professionalism, and passion for advocacy made an immediate impact, and we are grateful for the perspective she brought to our delegation.

Advocacy is one of the core pillars of Paralyzed Veterans of America. While adaptive sports and Chapter programs are often the most visible parts of our mission, meaningful change also happens in the halls of Congress. Every conversation with a senator, representative, or con-

The New England Chapter, Paralyzed Veterans of America (New England PVA) is a congressionally chartered veterans service organization founded in 1947 that has developed a unique expertise on a wide variety of issues involving the special needs of our members – veterans of the armed forces who have experienced spinal cord injury or dysfunction.

The New England PVA uses that expertise to be the leading advocate for:

- Quality health care for our members
- Research and education addressing spinal cord injury and dysfunction
- Benefits available because of our members' military service
- Civil rights and opportunities that maximize the independence of our members

To enable paralyzed veterans to continue to honor this commitment, we recruit and retain members who have the experience, energy, dedication, and passion necessary to manage the organization and ensure adequate resources to sustain the programs essential for the Chapter to achieve its mission.

Executive Director's Report

By Mark Murphy

Executive Director NEPVA

Dear Friends,

Summer has been an exceptionally busy and rewarding season for our New England Chapter, and I continue to be inspired by the dedication of our members, volunteers, and leadership. In June, I had the privilege of traveling to Washington, D.C., alongside our President and National Director, Brad Carlson, Treasurer Ericka Haddad, and Kathy Carlson for the PVA's Advocacy and Legislation Seminar. During our time on Capitol Hill, we met with members of the New England congressional delegation to discuss the issues that matter most to veterans living with spinal cord injury and disease. These conversations are vital to ensuring that the voices of our members are heard and that lawmakers understand the importance of protecting access to quality health care, disability benefits, caregiver support, and accessibility. Advocacy remains one of the cornerstones of our mission, and we are grateful to everyone who helped represent our Chapter so well.

Later in June, Brad, Kathy, and I traveled to Tampa for the National Veterans Golden Age Games. In addition to cheering on Brad as he represented our Chapter, the trip provided an excellent opportunity to learn more about how the U.S. Department of Veterans Affairs organizes and conducts those Games. That experience will help us better support and encourage additional New England members who may be interested in participating in future years. Congratulations to Brad on earning gold medals in both boccia and billiards - a tremendous achievement that reflects the dedication, perseverance, and competitive spirit

that our members bring to adaptive sports.

Most recently, many of us gathered in Detroit, Michigan, for the 44th National Veterans Wheelchair Games. The Wheelchair Games continue to demonstrate the power of adaptive sports to transform lives by promoting health, independence, confidence, and camaraderie. Whether competing, volunteering, coaching, or cheering from the sidelines, everyone involved helped make this year's Games another memorable success. Thank you to all of our

Advocacy remains one of the cornerstones of our mission, and we are grateful to everyone who helped represent our Chapter so well.

athletes, caregivers, staff, volunteers, and supporters who represented New England with pride.

As we look ahead, we are excited for one of our signature fundraising events of the year - our Annual Golf Tournament, taking place on August 17th at South Shore Country Club in Hingham, MA. This event not only provides a wonderful day of fellowship but also raises critical funds that allow us to continue delivering programs and services throughout all 6 New England states. We are grateful to our sponsors, golfers, volunteers, and donors whose generosity makes this event possible.

Thank you for your continued support of our New England Chapter. Every advocacy meeting, athletic competition, outreach event, and fundraiser reflects our shared commitment to improving the lives of veterans with spinal cord injury and disease. To-

Washington Update

CONTROVERSIAL VETERANS PACKAGE STALLS

The Take Care of America's Veterans Act (H.R. 9237), which consolidated 62 separate veterans-related bills into a single piece of legislation, was scheduled for floor consideration on July 16. As a reminder, this legislation includes PVA priorities that would increase Special Monthly Compensation for the most severely disabled veterans, improve survivor benefits, and codify VA's Bowel and Bladder program. It also includes a version of the Major Richard Star Act, which would fix an injustice preventing combat-injured veterans from receiving their full military benefits. However, the bill's pay-for would codify a proposed change to VA's rating schedule for tinnitus and sleep apnea. The proposed pay-for is very controversial and has divided the veterans community.

Before the bill could be considered, the House held a vote on a motion to send the bill back to the VA Committee and change the way the bill's provisions are paid for. The motion was narrowly defeated by a vote of 211-210. House leaders ultimately stopped any further consideration of H.R. 9237.

Further efforts to advance the measure are not expected to resume until fall. Lawmakers could use the delay to iron out controversial elements that contributed to the close vote. As a reminder, while PVA strongly supports many of the provisions in H.R. 9237, we have historically not supported reducing earned benefits for current or future veterans to pay for improvements to benefits for other veterans. We are particularly concerned about using VA funding to pay for a Department of Defense obligation (concurrent receipt). You can read our full statement on the bill [here](#).

House Committee Holds Hearing on VA's IT Systems, Post-PACT Act

On July 13, the House Committee on Veterans' Affairs, Subcommittee on Technology Modernization held an oversight hearing to examine the VA's implementation of the PACT Act to ensure the department's existing disability claims systems can quickly and efficiently process compensation and pension claims for current and future veterans.

During the hearing, PVA Associate Legislative Director Jeremy Villanueva highlighted some of the areas where the VA has fallen short in their efforts to improve the claims process using the latest technology. He pointed out that some of the modernization and consolidation efforts have not led to the drastic improvements promised and that it could be argued some changes have even set the claims process back.

Mr. Villanueva noted that two processes that the VA lacks are stopping payments in the case of a veteran reentering the military or removing a dependent off their award, which often cause significant overpayments that veterans have to pay back. In addition, he highlighted an April 2026 VA Office of the Inspector General report that identified significant issues with VA's Dependency and Indemnity Compensation's automation efforts. It noted that nearly 99 percent of the claims that went through the new process contained errors resulting in over \$2.7 million erroneously awarded. The members of the subcommittee thanked PVA for our participation in the hearing and expressed a desire to work with us on legislation to address these concerns.

More news and updates from
Washington on page 15.

From the President's Desk

by Brad Carlson
NEPVA President

Dear Friends,

I hope everyone is having a great summer! Summer is a wonderful time to be in New England, with so many beautiful places to visit and enjoy. I hope you've had the chance to get away and make the most of the season. As for us, it has been nonstop over the past two months! Our first stop, along with Executive Director Mark Murphy, was the PVA National Convention in Las Vegas. This annual event brings together delegates from across the country for National elections, bylaw updates, budget discussions, and important decisions that shape the future of our organization. It was a busy week filled with valuable information that I was able to bring back and share with our Board.

Next, we traveled to Washington, D.C. for the Advocacy & Legislation Seminar. We spent a day learning about the legislative priorities we would be discussing before meeting with members of the U.S. Senate and House of Representatives. Each year, we bring a different Board member to experience Capitol Hill and meet with our New England congressional delegation. This year, Ericka Haddad joined us and did a fantastic job in every meeting. Thank you, Ericka, for representing our Chapter so well!

From there, we headed to Tampa, Florida, for the National Veterans Golden Age Games. These Games are open to Veterans age 55 and older, and we attended to determine

whether this would be a good event for our members to participate in next year. I was pleasantly surprised and would highly recommend it. While many participants are ambulatory, wheelchair athletes compete within their own classifications. The Games were extremely well organized, and registration opens early, so I'll be sure to share those details in a future newsletter. Oh - and I was fortunate enough to bring home gold medals in both billiards and bocchia!

I want to take a moment to thank Joanie Lynch, Maggie Budd, Jim Clark, Holly Warshaw, Joe DiSalvo, and all of the volunteers who dedicated their time to making the Games a success.

Finally, we wrapped up our travels at the National Veterans Wheelchair Games in Detroit. Our Chapter was represented by approximately 11 athletes, along with an outstanding team of nurses and volunteers. This is our largest event of the year and takes months of planning to make it successful. You'll find the competition results elsewhere in this issue, but I want to take a moment to thank Joanie Lynch, Maggie Budd, Jim Clark, Holly Warshaw, Joe DiSalvo, and all of the volunteers who dedicated their time to making the Games a success. Their hard work does not go un-

noticed, and we truly appreciate everything they do! That's enough about traveling for this month!

Our Chapter continues to grow stronger, and I couldn't be prouder of our Board, staff, volunteers, and members. Our Annual Golf Tournament is just around the corner and is shaping up to be another sold-out event. It will be held on Monday, August 17, at South Shore Country Club in Hingham with a 12:00 p.m. shotgun start. We hope you'll join us for another great day on the course. Also coming up is our Annual Clambake on Saturday, September 13, at the Italian American

Meeting with Representative Maggie Goodlander (NH)

New England Coasters Shine in Detroit

By Mark Murphy, Executive Director

The New England Chapter of Paralyzed Veterans of America was proud to send more than a dozen Chapter members, along with Chapter staff, VA staff, coaches, nurses, and dedicated volunteers, to the 45th National Veterans Wheelchair Games in Detroit, Michigan. Co-presented annually by the U.S. Department of Veterans Affairs and Paralyzed Veterans of America, the National Veterans Wheelchair Games are the world's largest adaptive sports and rehabilitation event exclusively for military Veterans who use wheelchairs for athletic competition.

Throughout the week, our athletes demonstrated incredible determination, sportsmanship, and perseverance while competing against Veterans from across the country in a wide variety of adaptive sports. Whether competing for medals or participating for the first time, every member of the New England Coasters represented our Chapter with pride and embodied the spirit of resilience that defines our Veteran community. We are incredibly proud of all of our athletes and congratulate everyone on their outstanding performances. Their accomplishments are reflected in this issue's medal count, but their success extends far beyond the podium. The friendships formed, personal goals achieved, and confidence gained throughout the week are just as meaningful as any medal earned.

Events like the National Veterans Wheelchair Games are about much more than competition. They showcase the life-changing impact of adaptive sports by promoting health, independence, rehabilitation, and camaraderie among Veterans. Every year, participants return home stronger, more confident, and inspired to continue challenging themselves both on and off the playing field. Our sincere thanks go to the outstanding VA staff, volunteers, coaches, caregivers, and supporters whose countless hours of planning and encouragement made this experience possible. Their commitment ensures that our athletes can focus on competing, reconnecting with fellow Veterans, and enjoying an unforgettable week. The New England Chapter dedicates significant funds to support

Throughout the week, our athletes demonstrated incredible determination, sportsmanship, and perseverance while competing against Veterans from across the country in a wide variety of adaptive sports.

the Games each year as we deeply value this experience for our members.

Congratulations once again to all of our athletes for representing the New England Chapter with excellence. We also encourage members who have never attended the National Veterans Wheelchair Games to consider joining us next year. The 2027 National Veterans Wheelchair Games will be held in Orlando, Florida, and we hope to have an even larger New England team representing our Chapter. We look forward to seeing both returning and first-time athletes there as we continue to demonstrate the strength, determination, and resilience of our Veterans.

A Great Day of Bass Fishing

by Mike Guilbault

I was lucky this year and once again I was able to attend the SAVES Veterans Fishing Tournament on Candlewood Lake in Danbury, CT on May 12. This tournament is hosted by Gaylord Sports Association with CT Bass Nation and the Major Steven Roy Andrews Fishing Outreach Program, which is a program that NEPVA has supported for many years. These tournaments are free for all veterans and this year we had a field of 25 boats and all but nine anglers caught fish.

Thanks to one of the sponsors each angler was given a Lews American Hero rod and spinning reel combo. Joe Kowalski does a great job getting sponsors to donate great products. The 1st, 2nd and 3rd place teams each receive a great prize package of donated tackle and fishing accessories including polarized sunglasses!

We had a good group of NEPVA members attend this year. There was Ed Dusick and Thomas Ferland from Connecticut, NEPVA BOD member Keelan Zenion from RI and myself from Massachusetts. There was also another person that attended who is going to be applying to be an NEPVA member. Keelan and I were the only members that were able to catch fish. But we all had a great time at the event.

I was very pleased with my day on the water. My captain Steve Deguzis and I not only caught a decent limit of 5 fish but threw back about 8 bass over 2 pounds culling for the

biggest 5. Our limit was over 16 1/2 pounds and we ended up in 4th place by only a few ounces.

Many thanks to all the volunteers and sponsors that make these events possible. Grants from Move United and the Department of Veterans Affairs make these veterans programs available. Be sure to check out Gaylord Sports Association since they run quite a variety of programs year round, I believe they have 18 different activities, and a few are veterans only! Thanks to Katie Joly and Tyler Rogers from Gaylord for all they do and the photographs I used here. Enjoy your summer everyone and don't forget there will be another SAVES Bass Tournament in September at Lake Congamond in Suffield, CT. See page 9.

From Top; National anthem with Joe K saluting. Mike G's 4th place fish with captain Steve.

Left; Keenan and his captain with their fish, Thomas in boat, getting ready to head out on the water.

Right; Captain Steve and Mike on the water fishing.

Veterans Fishing Tournament in CT.....

The Veterans Fishing Tournaments are open water bass tournaments for veterans or service members with a permanent physical disability, visual impairment or PTSD. Tournaments are held in May on Candlewood Lake in Danbury, CT or in September on Lake Congamond in Southwick, MA. Each veteran will be paired with an experienced angler and boat captain for a day on the water. The tournament includes all fishing equipment, a weigh-in and an awards luncheon. Prizes are awarded for the top 3 weights.

This event is organized in collaboration with the Major Steven "Roy" Andrews Fishing Outreach Program and CT Bass Nation.

This program is funded in part by a grant from the United States Department of Veteran Affairs in partnership with Move United Warfighter Sports Program and is offered at **NO COST for veterans.**

Service Officers Report

The 5, 10 & 20 Year Rules Explained

by Michael Snape
Senior National Service Officer

Greetings to New England chapter members. Hope you are enjoying the warm summer sunshine. Make sure you dress for warmer temperatures and cool yourselves appropriately in these warm, humid conditions.

In this article we are going to discuss the five-year rule, the ten-year rule, and the 20 year rule as they relate to protected VA ratings.

The five-year rule basically says that after a VA disability evaluation has been constantly in effect for five years, the VA cannot reduce it without showing sustained evidence of permanent improvement in the condition. An example would be a knee injury which was rated at 20 % and in force for 6 years. The VA would need to provide medical evidence that the veteran's knee condition had shown sustained improvement over a period of time (such as physical therapy records showing marked improvement of the knee condition maintained over a significant period of time, or a knee examination by the veteran's orthopedist noting the knee had improved significantly over that last year). Please note that the five year rule does not apply to temporary ratings (such as a temporary 100% rating due to surgery, or issues assigned to a future exam (an example of this would be cancer currently under treatment, which would require an exam for residuals once cancer is in remission)

The ten-year rule is related to whether or not service connection for a claim can be severed. Under this rule, a VA disability in effect for more than ten years cannot be severed, unless it is shown that the original decision was based on fraudulent information, or if the veteran granted the condition did not have the necessary service or character of discharge. For example, a veteran has service connection for a shoulder injury that has been in effect for 12 years, and the VA proposed to sever the condition. Unless the original shoulder condition grant was based on fraud, or mistakenly granted service connection as occurring on ac-

tive duty, and the injury actually occurred during a period of reserve duty not shown by a line of duty determination (veteran did not have necessary service), or the condition was granted during a period for which the veteran received a bad conduct or dishonorable discharge (veteran did not have necessary character of service), the VA should not sever the disability.

The twenty-year rule basically says that a VA compensation or pension disability which has been rated constantly at a specific level of evaluation for twenty years or more will not be reduced to less than that level of evaluation unless the rating was based on fraud. For example, if a veteran has a rating of fifty percent (50%) for headaches that has been in place since 07/27/2005, and a subsequent rating was done in 2026 which showed some level of improvement, since the rating at the fifty [percent (50%) level has been in place for more than 20 years, the VA will continue the evaluation for the headaches at the fifty percent (50%) level because it is a rating in place for more than 20 years.

As always, there are exceptions to these rules, such as rating errors due to clear and unmistakable errors (CUE). In any event, any proposal to reduce or sever a service-connected issue should always be discussed with your local national service officer.

REMINDER: FAA Survey for People with Disabilities About Aircraft Evacuation

The Federal Aviation Administration (FAA) has launched a survey to gather feedback from passengers with disabilities regarding aircraft evacuations. The lack of research into the evacuation process for passengers with disabilities in air travel is a source of significant concern. Please provide FAA with your feedback by scanning the QR code.

PVA Policy Priorities

As we embark on the second session of the 119th Congress, PVA's priorities for 2026 are once again focused on ensuring access to the care and benefits PVA members have earned and the civil rights protections they deserve.

PVA priorities for 2026:

- Strengthen the Foundations of VA's Specialized Health Care Services
- Maximize VA Long-Term Services and Supports for Veterans with SCI/D
- Fortify the Financial Security of Veterans with SCI/D, their Families, and Survivors
- Increase SCI/D Veterans' Access to Health Care Services
- Ensure Equal Opportunity and Full Participation for Catastrophically Disabled Veterans

gressional staff member helps educate policymakers and ensures that the voices of veterans with spinal cord injury and disease continue to be heard.

We are grateful to everyone who welcomed us to Capitol Hill and took the time to listen. We will continue working to protect the benefits, health care, and opportunities our members have earned through their service to our nation.

VA Announces New Efforts to Combat Fraud

The VA recently announced that they are developing a new tool to scan submitted Disability Benefits Questionnaires (DBQs) for “tell tale signs” of fraud. According to the VA, this new system, which is not active yet and may be rolled out sometime in 2026, will help VA field staff detect suspicious patterns that may help identify when organized fraud rings are posing as legitimate medical providers to prey on veterans. They stress that this new system is not AI but relies on manual data entry and analysis. However, this announcement was not without its controversies.

A “Stars and Stripes” article initially reported that the VA had plans to “analyze one million old disability benefits questionnaires dating back to 2010 to identify possible signs of fraud using this tool. However, after backlash from the veterans community, the VA clarified that this new system is “forward-looking only... No Veteran’s claim or benefit will be reduced or denied because of this effort.”

HVAC Subcommittee Holds Legislative Hearing

On June 30, the House Committee on Veterans' Affairs (HVAC), Subcommittee on Health held a legislative hearing to consider a broad package of bills aimed at improving veterans' health care access, accountability, and system oversight. The legislation considered addressed a wide range of issues, including reducing delays in veteran burials, expanding access to innovative spinal cord injuries and disorders technologies through the Veterans STAND Act (H.R. 6835/S. 3988), studying the effects of neurological injuries from blast exposure and G-force stress, improving access to care for veterans living in medical deserts, strengthening oversight of the Foreign Medical Program and Medicare coordination, establishing a national task force on caregiving youth, codifying the Coaching into Care program, increasing transparency in VA staffing, improving personnel accountability, and requiring greater public access to Veterans Health Administration policies. PVA submitted a statement for the record on the bills under discussion.

*Scan the QR code to
watch the hearing.*

PVA APPOINTED TO DOT ACAA ADVISORY COMMITTEE

On June 3, U.S. Department of Transportation (DOT) Secretary Sean Duffy appointed Chief Policy Officer Heather Ansley to the Air Carrier Access Act Advisory Committee (ACAA Advisory Committee or Committee) as a representative for national veterans' organizations representing disabled veterans and Co-Chair of the Committee. The Secretary established the Committee pursuant to the FAA Reauthorization Act of 2018 to advise on issues related to the air travel needs of passengers with disabilities. The FAA Reauthorization Act of 2024 subsequently extended the statutory authorization for the Committee to September 30, 2028. PVA wrote the original legislation authorizing the Committee and advocated for its passage.

VA Expands Emergency Community Care Notification Options

Beginning August 10, veterans will have an additional option for alerting VA that they've received emergency care at a non-VA hospital. Under current law, veterans or providers must notify VA within 72 hours of emergency treatment for the care to be considered for authorization under the Veterans Community Care Program (VCCP). Previously, this notification was required to be made to the appropriate official at the nearest VA medical facility, often via telephone. The new rule allows for notification through VA's centralized Emergency Care Reporting process, providing a single, nationwide system for reporting emergency care.

Veterans and providers may still notify the nearest VA medical facility, if they choose. This rule does not change veterans' eligibility for emergency care, the requirement to notify VA within 72 hours, or the standards VA uses to determine whether emergency treatment qualifies for payment. Instead, it modernizes the notification process by reducing confusion about where notifications should be sent. The link for the new system will appear [here](#) on August 10.

*Beginning August
10th you can view
the new online sys-
tem by scanning the
QR code.*

*Scan the QR code to go
to PVA Action Force to
send your representative
a message.*
